Video instructions on how to run:

https://www.youtube.com/watch?v=KKpAlNJsb6M

How to run project written instructions:

1. **Download the Zip File**:
   - Begin by downloading the zip file submitted in D2L.
2. **Extract Content**:
   - Extract the contents of the zip file into your desired file location.
3. **Open Project in Visual Studio Code**:
   - Navigate to the folder containing the project files.
   - Open Visual Studio Code and load the project.
4. **Run Docker Compose**:
   - Open the terminal in Visual Studio Code.
   - Type 'docker-compose up' and press Enter.
   - Wait for the command to finish.
5. **Access the Project**:
   - Once the command completes, open a web browser.
   - Type localhost into the address bar and press Enter to access the project.
